UK Registered Charity
Number: 1175762

This is a picture of Sudan. He lived in Kenya and was the last known male **northern white rhino** (a sub-species of the white rhino) left IN THE WORLD!

He was the rarest **mammal** in the world until he died of old age in March 2018.

All the other rhinos like Sudan that lived in the wild were hunted and were forced out of their **habitat**. Sudan lived with the last two female rhinos of his species on a Conservancy in Kenya called Ol Pejeta Conservancy.

Sudan's daughter (Najin) and granddaughter (Fatu) are the last two northern white rhinos alive in the world today. They have to be protected at all times by rangers (guards) with guns.

Unfortunately neither Najin and Fatu are able to any more rhino babies, so this rhino species will become **extinct** when they die.

However, a global team of scientists and **conservationists** are working hard to help recover the northern white rhino sub-species through an IVF programme.

To adopt a northern white rhino and help protect this rare sub-species go to:

ACTIVITY

🦏 Use a dictionary to find out the meanings of the words below, then write your own sentence using each word:

🦏 Mammal

🦏 Habitat

🦏 Sub-species

🦏 Extinct

🦏 Conservationist

WRITING EXERCISE

🦏 If you could write a letter to the people who would like to hunt rhinos like Sudan, what would you say to them? Remember to send in any of your work to us at rhino@helpingrhinos.org.
