“Hi, I'm Diego and these are my friends' Scarf and Otis. We need your help to find the poachers camp and arrest them, select your colour counter and LET'S GO!”
**Introduction**

In the last 10 years more than 7,000 African rhino have been illegally killed. Belgian Malinois, German Shepherd or Bloodhounds once trained, are capable of search, track and attack of poachers and make highly effective members of the anti-poaching teams to help protect rhino and other wildlife. With dogs, anti-poaching teams are now much better equipped to track at night and can cover greater ground.

At Helping Rhinos our brand-new educational initiative #BeMoreRhino, aims to design and produce factual and fun learning material that all the family can play.

#BeMoreRhino - K9 Capture is a family friendly board game, that will keep you all entertained whilst educating you on the importance of using ‘a man’s best friend’ to help protect our beautiful wildlife.

**How to play**

1. Get a grown up to carefully cut out the right number of counters for the amount of players

2. Get a grown up to cut out the FUN FACT cards and place them down next to the playing board (Fact side down, no peeking!!)

3. The poachers have set up camp in the bush, help Diego, Scarf and Otis; the anti-poaching K9 unit find the poachers and arrest them

4. Take in turns to roll the dice and move your way through the board, with the aim of getting to the end (The poachers camp)

5. Be sure to take care, there are wild animals in the bush, and they are extremely good at camouflage

**Rules**

1. 2 – 6 players

2. Look out for tracks along the way, if you land on a Rhinos footprint then take a card from the FUN FACT card pile and read it out to the rest of the players. These will teach you fun facts about the dogs

3. If you land on human footprints, then you must take 5 steps back on the board

If you would like to help support the work of our anti-poaching dogs head over to our website where you will find lots of information about the K9 unit and how you can help:

[https://www.helpingrhinos.org/adopt-a-dog/](https://www.helpingrhinos.org/adopt-a-dog/)

#BeMoreRhino is an interactive programme of activities for everyone to do at home to learn more about rhinos and rhino conservation, for a direct link to the page:

[https://www.helpingrhinos.org/bemorerhino](https://www.helpingrhinos.org/bemorerhino)

**You will need:**

- To print the board provided
- Dice (not included)
- Scissors to cut out the counters and FUN FACT cards
- Your imaginations to fully immerse yourselves into the African bush on the hunt for poachers 😊
**Player tokens**

**FUN FACT CARDS**

- **Anti-Poaching dogs** are used to search, track and trace
- The **Anti-Poaching dogs** have extreme stamina
- **APU dogs** can smell a poacher from over a kilometre away
- **Once an attack dog bites, they will not release until the handler gives the command**
- **Anti-Poaching dogs** work better than any technology
- **Bloodhounds** are trained to sniff out the poachers
- **The Anti-Poaching dogs** are extremely strong
- **The Anti-Poaching dogs** have an extremely reliable sense of smell
- **Scarf and Otis** are Bloodhounds
- **Diego is a trained attack dog; the handlers use bite suits or sleeves to train the dogs**
- **Antonio** is a Belgian Malinois
- **Diego** is a trained attack dog; the handlers use bite suits or sleeves to train the dogs
