Top 5 Javan Rhino Facts

-  Javan rhinos can live between 35 and 40 years!
-  They are solitary like the other species of rhinos but will come together at wallows, salt licks and for breeding.
-  Javan rhino has a very similar armoured like skin as the greater one-horned rhino. However, they have a mosaic type pattern almost giving the appearance of scales.
-  Males have a small horn that measures up to 9.8 inches, however it is believed that females lack a horn altogether!
-  Aside from humans, rhinos typically have no predators in their range.
