Top 5 White Rhino Facts

-  White rhinos are one of two African species and they are grazers, munching on the grasses like nature's huge lawn mowers.
-  They can live to be 50 years old!!
-  They are also known as the square lipped rhino. A group of rhinos is called a CRASH!!
-  There is no colour difference between the white rhino and the black rhino.
-  The White rhino has two remaining subspecies, the southern whites and the northern whites. There are only 2 northern white individuals left in the world and they are both female.
